

## **Cisco CCNA (200-301)**

### **Configure Cisco WLAN Management**

Description: Wireless networks may need configuration and tuning. You will learn different methods to access APs and WLCs. Also identify some of the settings to configure your WLAN environment.

**Q: How is home wireless management different than business wireless management?**

**Q: Is accessing the wireless management different for business than for home?**

**Q: What would be some wireless management features I should know about?**

- WLAN creation, security settings
- QoS profiles
- Advanced WLAN settings

### **Endnotes, External and etc.,**

- 2.8 Describe AP and WLC management access connections (Telnet, SSH, HTTP, HTTPS, console, and TACACS\*/RADIUS)
- 2.9 Configure the components of a wireless LAN access for client connectivity using GUI only such as WLAN creation, security settings, QoS profiles, and advanced WLAN settings.
