

## **Cisco CCNA (200-301)**

### **Episode Title: Describing Physical Network Cabling**

Learner Objective: Identify physical cabling components

Description: You will learn about the breakdown of physical cabling termination used, and handling information.

#### **Questions:**

##### **H: What do we need to know about physical cabling?**

breakdown, capabilities and context

##### **H: What do you mean by breakdown?**

e.g., copper cabling, specifications (conductor, speeds, category, etc.)

- e.g., fiber optic (table-conductor, speeds, category, etc.)

##### **H: Can we talk about some of different connection types we make with cabling?**

- Ethernet (multiple access or "shared media")
- Point-to-point

#### **Endnotes, External references, etc.**

Objective: 1.3a,b
